Description:

Intermediate German is a continuation of Essential German. It will review, expand upon, and add to the foundation that was built in Essential German. In other words, this course contains: an in-depth review of important vocabulary and grammar from Essential German; an expanded and more advanced look at some key vocabulary and grammar from Essential German; and an introduction to idiomatic language and more challenging structures. The themes are around everyday life: house and home, everyday life, how are you feeling, on the phone and online, and getting around town.
