Description:

The objective of this course is that students would glorify God by appreciating the gift of music. The scope of the course will be classical music, with some folk songs and hymns. Students will develop listening skills (which may be useful in other aspects of their lives!) and vocabulary for talking about and understanding music. They will also learn about how music is made by studying the lives of composers and/or the stories behind certain compositions, as well as by studying the components of music such as rhythm and pitch. They will examine sheet music and learn about how music is notated. They will have a chance to observe instruments and learn how they are played. Activities will include explorations of instruments with guest performers, listening to compositions, coloring, rhythm games and singing.
