**Description:**

The fall semester will be a basic art class. We will work with a variety of mediums (crayons, markers, colored pencils, pen and ink, pencil, watercolors, acrylics, watercolor pencils, pastels, and collage). We will work with a variety of subject matters as well including nature and landscapes, animals, cartoons, people, and some technique specific projects (such as perspective). New by request this year will be some project assignments where the instructor will work with the class step by step to draw a specific subject (such as an animal). The spring semester is my children's book story class. I will have a basic story idea for the semester. Students will help me design the main characters and then each week we will do a new illustration with a variety of mediums that tell the story. All materials are covered by the lab fee.
