Description:

The fall semester is a drawing class. We will work with a variety of drawing mediums (colored pencils, pen and ink, pencil, and pastels). We will work with a variety of subject matters as well including nature and landscapes, animals, cartoons, people, etc. The spring semester is a painting class. We will start off working with watercolor pencils (which is a combination of drawing and painting) and then work with watercolors and acrylics. Again we will work with a variety of subject matters. I like to allow students to bring in their own reference photo to complete a project when ever possible. New this year by request will also be assignments where the instructor will work step by step with students to complete a specific assignment (for example doing a painted landscape). All materials are covered by the lab fee.
