

2016-2017 CHEF Co-op

High School Biology

Instructor: Kelsey Swift

Class Code : BIO400

Co-teacher?

Tuition : \$120/year (\$60/semester)

Length of Class (1st sem/ 2nd sem/both) both

Materials Fee : \$80/year (\$40/semester)

Description

Bacteria, trees, fish, insects, mold, birds, algae...There is something in biology for everyone! Take a tour of the living components of God's creation through this biology lecture and laboratory course. Topics of study include the cell, genetics, classification, anatomy, ecology, biochemistry, and much, much more. Laboratory activities will include dissections, experiments, models, laboratory reports, and student-directed research. Lectures will reinforce textbook learning and also provide space for discussions, student presentations, and relevant reading and writing assignments.

Grading Policy

Standard Policy

X

Specific Policy

This class will implement the standard grading policies with the following notes: Each student (not a parent or teacher) is responsible to make arrangements for missed material prior to a scheduled absence or as soon as possible following an unexpected absence. One late homework assignment per semester may be turned in with no penalty; subsequent late assignments will be deducted 10% of the value of the assignment per day that it is late.

Enrollment:

10

Max: 25

Pre-Requisites: none
